

# Đặng Bảo Khang

## Fullstack Developer

Fullstack Developer with nearly 2 years of experience building and modernizing production web systems. Strong hands-on experience with **Java, Spring Boot 3, AngularJS, Angular 19–20**, real-time data processing, legacy system migration and admin platforms. Capable of delivering end-to-end solutions from backend to frontend in production environments.

## WORK EXPERIENCE

### A.D.A (Product-based company providing video monitoring software)

**Fullstack Developer – A.D.A Co., Ltd.** ( 2024 - 2026 )

- Developed and maintained fullstack web applications using Java Spring Boot and Angular.
- Participated in backend and frontend design, implementation and optimization.
- Collaborated with cross-functional teams to deliver features on schedule.

## PROJECTS

### Installation Marketplace Admin System

**Role: Fullstack Developer** ( 07/2025 - 02/2026 )

Tech: Angular 20, Spring Boot 3.4, MyBatis, MySQL, Kafka, Redis

- Designed admin UI flows and layouts using Figma before implementation
- Developed admin web app with Angular 20
- Built Spring Boot backend with MyBatis
- Designed and optimized APIs and DB interactions

### AngularJS → Angular 19 Core Migration

**Role: Frontend / Fullstack Developer** ( 01/2025 - 10/2025 )

Tech: AngularJS, Angular 19

- Migrated legacy AngularJS application to Angular 19
- Refactored core modules
- Improved system maintainability and performance after migration

### IoT Temperature Monitoring System

**Fullstack Developer** ( 03/2024 - 12/2024 )

Tech: Java, TCP/IP, MySQL, PHP, AngularJS

- Developed a Java TCP server to receive and process temperature data
- Stored and processed data to MySQL
- Built API with PHP
- Built monitoring website with AngularJS
